

TITLE 73
GENERAL CODE PROVISIONS
CHAPTER 1

CONSTRUCTION OF STATUTES

73-109. COMPUTATION OF TIME. The time in which any act provided by law is to be done is computed by excluding the first day, and including the last unless the last is a holiday and then it is also excluded.

History:

[(73-109) C.C.P. 1881, sec. 8; R.S., sec. 11; reen. R.C., sec. 11; reen. C.L. 500:11; C.S., sec. 9451; I.C.A., sec. 70-109.]

The Idaho Damage Prevention Board has advised that the One-Call Notification practice in effect for many years does not calculate time in compliance with 73-109 above. It felt that it would not be able to support the Call Centers using this practice in the event of a conflict between the two. It therefore requested that the One-Call Call Centers in Idaho voluntarily comply with the Idaho Statute above defining Computation of Time.

The change in practice described below is intended to do this. Effectively, it will mean that the Notification Period will be two-days-plus-a-few-hours instead of two days. It will also mean that start time will always be at midnight on a business day, if all facilities have been located. Please see the next page for the old and new methods.
